Thanksgiving! by: Isabella Jimenez

Hello everyone! In this week's article I will be talking about, the importance of Thanksgiving. This week I talked to three different students from Mrs. Caughey's graphic design/yearbook club and asked them to share their thoughts about Thanksgiving. Alyssa Barrios from 4C says, "I give thanks for my parents and friends. Brennen Dopwell from 6b says "I like to gather around with my family and like to celebrate together." Zach Adileh from 4c says "I love to have people over, eat food from my country and make a fire-work celebration! Celebrating Thanksgiving is important in the United States. Have a happy thanksgiving everyone!

Alice in Wonderland Jr. by Priscilla Jiminez

Alice in Wonderland is here! Time to think of what you want to be for the play. Ms. Fantasia is going to be the director of the play. Tuesday, November 17th was singing audition. If you were there you would know a lot of people auditioned. I asked Alexandra Vargas what it was like and she said, "It was very tense and I was very nervous when I had go up with a lot of people in front of me and sing." I also asked Ms. Fantasia what she would be if she was in the play she said, "I would be the queen of hearts! She's mean and really-over the top, she gets to sing and her lines and songs are really funny. When I asked Ms. Fantasia about the costumes she said that they were in construction and she said that some of the costumes they would buy and some they would rent from the costume company. That's all about Alice in Wonderland!

Science Fair! By Tiana Masso

The Science Fair is coming up! What are you planning to do? There are going to be four major parts: The experiment, the research paper, the visual display, and the oral presentation. There is going to be a first, a second, and a third place. The winners will receive prizes too! This will be Bergen Arts and Science Charter School's third Science Fair. It is going to be great. Make sure to create an interesting project so that you can win! You can also partner up with any grade in the school. Have fun!

Save the Rainforest!

by: Unnimaya Das, Anthony Cecere
Anyssa Espinal, & Betul Mamaloglu (5A)

Did you ever think what would happen if all of the rainforests disappeared? No, I bet you didn't. The rainforest provides us with materials such as chocolate, tires, and even gum. If you are sick, you go to the doctor and get medicine. But do you know where some of that medicine comes from? Twenty-five percent of medicine comes from rainforests! Rainforests are also essential for recycling water. Unfortunately, 1.5 acres of rainforest are destroyed every year. Generally, when people clear-cut a rainforest, the land is only usable for one or two more years. After this, the nutrients from the plants are depleted, leaving a huge barren tract of land. About 130 rainforest species disappear every day. Therefore, take a look at the

Movie Review: *UP*

by Alexandra Vargas

Have you ever seen the movie *Up*? Well I did. It's about an old man named Carle Fredrickson (Edward Asner) who makes an air balloon to travel to South America. His goal is to find a big mountain. His wife, Ellie's couldn't wasn't able to travel because she was too old. However, it was her big dream. Carle Fredrickson wants to fulfill his wife's lifelong dream to travel to South America.

I really liked the movie because it was funny, sad and a very great movie with adventure. It made me think about my great, great, great grandfather who took so many boats, planes, and vehicles to travel far and wide. It was the greatest movie experience ever. Now you can go see for yourself how great the movie is. Want to learn more? Well, go to the movie store and rent the movie!
